<sup>\*</sup>These guidelines are to be used as a general reference only. The individual patient's clinical findings must be assessed when selecting the rate and type of fluid therapy.

### **Dechra Veterinary Technical Services**

<sup>\*\*</sup>Lactated Ringer's and 5% Dextrose Injection can be used for any patient in which Lactated Ringer's Injection is indicated, but only after it is hydrated. It is a maintenance fluid, not a replacement fluid.

<sup>\*\*\*</sup>Fluid choice depends on the patient's sodium concentration.

# **DECHRA'S IV FLUID PORTFOLIO**

Vetivex® Lactated Ringer's Injection, USP

500 mL and 1000 mL bags

Vetivex® Lactated Ringer's and 5% Dextrose Injection, USP 1000 mL bag

(Multiple Electrolytes Injection, Type 1, USP) 1000, 3000, and 5000 mL bags

Vetivex® 0.9% Sodium Chloride Injection, USP 1000 and 3000 mL bags

\*All 1000 mL bags and smaller are composed of PVC-free, DEHP-free, and latex-free plastic and have two color-coded, identical, dual purpose ports that can be used for the insertion of fluid administration sets or injection of fluid additives. All 3000 mL bags are latex-free and have two ports; one port is color-coded and can be utilized for insertion of the fluid administration set spike or injection of fluid additives. All 5000 mL fluid bags are latex-free and have two color-coded, identical ports that can be utilized for insertion of the administration set spike. A third port is available for injections only.

CAUTION: Federal law restricts these drugs to use by or on the order of a licensed veterinarian.
